

Dear Admissions Committee,

I am pleased to strongly recommend **Yeabkalu Assefa Merkebe** for admission to the *Fordham University Masters in Data Science program*. As his professor for several courses at **Addis Ababa Science and Technology University**, I have witnessed firsthand his stellar academic abilities and drive to use technology to serve communities.

In my **Wireless Communications course**, **Yeabkalu** gave an outstanding presentation on 5G network architecture. He demonstrated an impressive understanding of complex concepts like Massive MIMO, mmWave, and the radio access network. His eloquent ability to communicate this highly technical information and answer any questions reflected both his grasp of the material and his skill in adapting this knowledge to an audience.

Similarly, Yeabkalu analyzed research papers on design patterns like the Decorator pattern in my Software Component Design course to deliver an engaging presentation. As I commented, "He meticulously explained key components, seamlessly integrated real-world examples, and effectively employed diagrams and code snippets to enhance comprehension." He even created a project showcasing applications of various patterns. Yeabkalu earned top grades of A and A- in my challenging courses. This exemplifies the diligence and aptitude I know will make him successful in graduate studies.

Similarly impressive were his analytical abilities in applying academic concepts to real-world solutions. For his senior project developing an **AI system for malaria detection**, I connected him with resources and professional contacts. Though not formally his advisor, I was impressed by his eagerness to learn and determination to create technologies benefiting communities.

Yeabkalu's academic record also supports my recommendation. He earned top grades in my challenging courses. Additionally, he was recognized on the **President's List for academic excellence** in his junior year, exemplifying his consistent diligence and aptitude.

In summary, I give my **strongest recommendation** for **Yeabkalu's** admission to the *Masters in Data Science* program. His academic excellence, communication abilities, resourcefulness, and passion for impacting communities through technology make him a promising candidate to contribute to innovative research.

Please feel free to contact me if you have any other questions.

Sincerely,

Mr. Muleta Taye Tujuba,
Lecturer, AASTU, and ML Engineer
